Legislative Fiscal Analyst
CLAYTON SCHENCK

DATE: Thursday, May 22, 2008

TO: Legislative Finance Committee

FROM: Cathy Duncan, Senior Fiscal Analyst, Legislative Fiscal Division 

RE: LRBP and LRITP Project Status Reports

The attached reports provide an update on the status of Long-Range Building Program (LRBP) and Long-Range Information Technology Program (LRITP) projects. There will not be a formal presentation of this information at the Legislative Finance Committee meeting of June 5th and 6th. If you have questions concerning these reports, please feel free to contact me at (406) 444-4580.

In the work of the Long-Range Planning (LRP) working group, a report format was developed to keep legislative members apprised of the status of certain LRBP and LRITP projects. The LRP working group recommended that the reports be updated twice each year during the interim. The attached reports are being distributed now to meet that recommendation. A final status report will be provided at the November LFC meeting.

How to Read the LRBP and LRITP Reports

The LRBP report contains project appropriations, as approved by the Legislatures for the 2003 biennium through the 2009 biennium. The report is organized in sections by administering agency. The projects are then sorted by the requesting agency. The report generally does not include statewide LRBP projects or projects made up of multiple small projects. As you read this report, you will notice that each section contains the name of the administering agency and a contact person for that agency, should you have additional questions about a project. In reading across the table, you will see the name of the project, the biennium of appropriation, the fund type appropriated for the project, and the total project appropriation. Next, you will see a set of milestones, developed to inform you as to the status of the project. Following the milestones section, you will see an estimated completion date column. The date in this column is the completion date of the contractual construction agreement. Finally, at the bottom of the report you will find a key for the table and notes concerning the information contained in the report.

The LRITP report contains only those IT project appropriations approved for the 2009 biennium, since the IT capital project program is new. The report is organized by the administering agency. The report is organized similar to the LRBP report, but in the case of the LRITP, the requesting agency is the administering agency. As you read across the columns, you will see the project name, the biennium of appropriation, the fund type appropriated for the project, and the total project appropriation. Next, you will see a set of milestones, developed to inform you as to the status of the project. The estimated completion date provides a best guess assessment by the agency on when the project will be completed. Finally, at the bottom of the report you will find a key for the table and a description of the milestone designations.

SS - State Special Revenue Funds

FS - Federal Special Revenue Funds

PR - Proprietary

O - Other Funds (Donations, Grants)

B - Bond Proceeds

- * Note: Estimated completion dates are determined as a component of the contractual construction agreement.
- * Note: In most cases, completion dates for projects in warranty prior to the development of this report have not been included.
- * Note: This list generally does not include statewide projects (for example roof repairs, statewide).
- * Note: Most FWP and DOT projects are not listed on this summary because those projects are generally more in the form of programs, containing multiple projects.
- * Note: The DOC Preservation & Improvements, Virginia and Nevada Cities project is not on this list because it contains multiple small projects.
- * Note: This list does not include Federal Spending Authority projects from DMA because the projects contain multiple small projects.
